SKILLS

HTML • CSS • SASS • Tailwind •
JavaScript • JQuery • NodeJS •
Express • React • Redux • MongoDB •
Firebase • Git

Familiar:

C • C++ • Python • Java • TypeScript •
Angular • Vue • Machine Learning •
NextJS • Chrome Extension

VOLUNTEERING

TEDXBVCOE | TECHNICAL HEAD
Jul 2021 - Sep 2021
Designed and developed event's website.
Hosted at tedxbvcoe.com.

ACM BVP | WEBMASTER
Jul 2020 - Jul 2021
- Designed, developed & maintained the website of ACM BVP (college's technical club). Hosted at bvcoe.acm.org.
- Taking sessions/webinars on basics of Web Development for freshmen.

ABOUT ME

Pursuing MS in CS (Data Science track) at UTDallas. Loves to build things for the web and obsessed with the notion of improving oneself. Skilled as a full-stack web developer, with proficiency in front-end development using React. PS, I have a considerable skillset in Data Structures.

EXPERIENCE

MINUTE | FRONTEND DEVELOPER
Apr 2021 - Aug 2021 | Remote

- Providing a blazing fast experience to take effective meetings.
- Primarily worked with React and Redux.
- Visualised meetings analytics data in the form of charts and graphs.
- Converted design mocks into React components.
- Built a Google Chrome extension providing the product's key features.
- Deployment using Docker images on Google Cloud Platform.
- Learnings: Caching server state data using React-Query, Developing Chrome Extension, Setting up a custom WYSIWYG editor and more.

CODING NINJAS | TEACHING ASSISTANT
Feb 2020 - Jun 2020 | Remote

- Debugged codes of students & corrected their approach for different problems.
- Took doubt sessions on Data Structures problems in Java.
- Monitored the performance of students to make sure that they were completing the lectures and assignments on time.

CODING NINJAS | SOFTWARE DEVELOPER INTERN
Feb 2020 - Apr 2020 | New Delhi, INDIA

- Developed a realtime code sharing web application using React and Firebase.
- Created open-source projects for the students enrolled in web-development online course to help them get started with open-source contributions.
- Worked in a team on various hands-on projects.
- Learnings: Git, GitHub, React, Firebase.

PROJECTS

CODEROOM [LINK](#) | [GITHUB](#)

- A web app for collaborating and sharing codes in realtime. Supports various languages, requires Google authentication, create and save sessions, send session clones to all or individual participants, and more.
- Tech Stack: React, Firebase, Firepad.

SLACK CLONE [LINK](#) | [GITHUB](#)

- A clone of Slack web app built using React and Firebase. Create new channels, direct messaging to users, star channels, choose color theme for the app, upload and send images, update user avatar, see channel's top posters, emoji-picker and more.
- Tech Stack: React, Redux, Firebase, Semantic-UI.
